Programming Languages: **JavaScript**
Frameworks/Libraries: **Bootstrap**
Version Control Tools: **Git**
Methodologies: **Agile, Object Oriented Programming, Functional Programming**
Soft Skills: **Time management, Task delegation, Problem solving, Conflict resolution**

Projects

Startup Employee Directory | JavaScript, HTML, CSS
This mock employee directory utilizes the Random User Generator API to fetch and display user data in the form of 12 individual employee cards organized in a grid. Clicking a card will display a modal window that includes more detailed employee information.

Conference Registration Form | JavaScript
A mock conference registration form with dynamic user contact info, t-shirt order, activity registration, and payment sections. Features include real-time form validation, dynamically generated options based on user selection in previous relevant select box, and dynamically disabled registration for activities whose schedules conflict with previously selected activities.

WebApp Dashboard | JavaScript, HTML, CSS
A user interface that utilizes interactive charts by Chart.js to represent site traffic. Includes messaging section with form validation and toggleable settings switches.

Experience

Language and Culture Assistant Instructor
Ministerio de Educación | Bailén, Spain
Oct 2019 – Oct 2020

- Adapt customized lesson plans for the classroom in coordination with lead instructor;
